DRUMS

*A collection of side tables
with an impacting
geometric design.*

Designed to make an impression. Suitable for both individual use or as a grouping the impacting and attractive geometric design of the Drums side tables is guaranteed to be noticed.

The three eye-catching bases for the Drums collection can be chosen to combine with the table tops in aluminium, iroko timber or solid ultra-compacted natural stone effect. Nine versions that together with the different colour tones offered by the collection make for a very versatile stylish variety of options.

The diameter of the different tops depends on the base: the cylindrical one measures 40 cm while the conical one measures 70 cm, and the frustoconical base table measures 60 cm across. The first two are both 40 cm in height and the latter 50 cm off the ground. All of which means that creating compositions featuring bespoke rhythms, richness in finish, colour and texture is made easy.

The tables belonging to the Drums collection are very hard wearing and durable under external conditions thanks to their materials but their good looks also make them very suitable for indoor spaces.

The Drums collection offers a series of default colour tones, sizes and finishes that OISIDE can further customise according to the needs of individual projects, in any RAL colour card choice, as well as other finishes and sizes.
