ELEMENTS

*A collection of modular furniture that,
with only three pieces, allows you to
create multiple combinations.*

The Elements collection can be easily reconfigured, adapting to the functional or spatial needs of each moment. By its design, with deep and low height seats, it is a collection perfect for designing rest areas.

Elements design is technically developed so that the different furniture options modular that allows you to create versatile and agile laying out modules are linked together with a hook that fixes the pieces at the bottom. A hidden connection, very easy to use, that allows to reconfigure the parts simply by lifting the modules and separating them from the hooks.

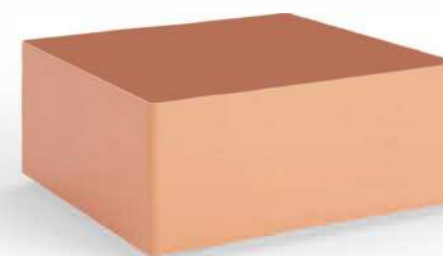

The combinations that can be achieve with Elements are innumerable: from individual armchairs, chaise longues or sun loungers, to two-seater sofas or the desired length and depth.

Its distribution can be in line, L, U or island style with the backrests in the middle, so that the sofa can be accessed from all sides. Elements allow you to have all these seating options with a simple gesture.

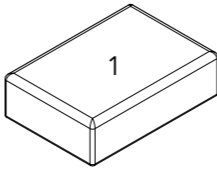

The collection is completed with a square and a rectangular side table, available with an aluminum structure and an HPL tabletop, customizable in any shade of the RAL chart or with Dekton envelopes. The rectilinear and monolithic appearance of this collection of modular furniture contrasts with the sensation of lightness provided by the recessed skate of its bases and with the comfort of its seats, achieved with a filling of three types of foams with a wadding finish.
